3 Years (2016-17 graduates)	\$6,536	\$16,818	\$31,551	\$54,190	\$68,625
18 Months (2018-19 graduates)	\$3,890	\$7,133	\$15,741	\$33,926	\$49,427

As reminder, the median value represents the very middle value of the sample of values (wage or debt) sorted from low to high. This value is found in the middle line of the barcharts.

The remaining values in the chart are constructed similarly, to display how wages and earnings are distributed. Thus, while the median is the middle wage, the values for the 25th and 75th percentiles tell us that half of the graduates with wages fall between those two values. Likewise, 80% of reported wages fall between the 10th and 90th percentiles. The length of each bar section clue to the dispersi the data - that is, how much earnings can vary within a range a group of individuals.
